

# UniCube M Series

UV LED light source for batch irradiation

## Features

Flexible illumination area:

- ◆ Achieves a range of 50 \* 50 mm<sup>2</sup> to 400 \* 400 mm<sup>2</sup> or more, depending on how the Cube is assembled

High intensity:

- ◆ Provides 500 mW/cm<sup>2</sup> or more at 365 nm, making it ideal for the curing process

Long life:

- ◆ Incorporates Ushio's unique air-cooling technology for extended lifespan

Easy maintenance:

- ◆ Individual components can be replaced

The UniCube series offers breakthrough performance for batch irradiation. It is the world's first LED module that can irradiate areas from 50 \* 50 mm<sup>2</sup> to 400 \* 400 mm<sup>2</sup> in a single batch. Ushio's unique four-way coupling technology achieves high intensity, which in turn enables uniform curing of the entire area. This results in stable manufacturing processes and improved product quality. In addition, the UniCube series is characterised by its easy maintenance and long-lasting, stable performance.

Applications

- ◆ Tape peeling and dicing
- ◆ Curing OCA/OCR
- ◆ Imprint exposure
- ◆ Curing various inks and adhesives
